

Protect Your Investment with OtterBox

School tablets are a costly investment. But the cost of keeping technology in the classroom is even higher when those devices aren't properly protected.

Accidents happen. It's only a matter of time before devices are dropped, dinged, or even stepped on. That's why our DROP+ protective cases are precision designed to not only protect devices from dirt, dust and other debris, but they are also dropped, scuffed, tumbled, scorched, scratched (and more!) until we know for sure they are ready for the classroom.

DROP+
TESTED to MILITARY STANDARD

Protective cases and screen protectors are an added up-front cost when buying or leasing devices for your school, but the long-term savings and cost control will significantly reduce device repair costs while extending the average lifespan of your school-owned tablets. But don't take our word for it - have a look at the cold, hard facts for yourself:

30%

tablets damaged

Approximately 30% of all tablets are damaged in schools every year¹

£395

average repair cost

The average cost for tablet repair can cost £395 / €450 or more, depending on the device²

£41

typical deductible

The typical deductible for insured tablets is £41 / €49²

2-5

business days

The average turnaround time for device repair is 2-5 business days, taking the device out of a student's hands for up to an entire school week²

4x

value

A protected tablet in perfect or near-perfect condition is worth up to 400 percent the value of a damaged device

With reliable device protection, your school can improve student learning, reduce the need for costly repairs, and protect the resale value of your tablets to get the most out of your investment. Meanwhile, your students benefit from more consistent access to digital education tools.
